a redirecting unit coupled to said image source to direct said fractions to respective non identical spatial regions of a reflecting unit such that said fractions are viewed by a person as a seamlessly integrated image.

10. (Twice Amended) A helmet comprising:

a reflecting unit with operative connection to said helmet;

an image source to produce significantly non-overlapping [non identical] spatial fractions of an image [fractions];

relay optics having a field of view associated with said [image] fractions;

and

a redirecting unit coupled to said image source to direct said fractions to respective non identical spatial regions of said reflecting unit such that said fractions are viewed by a person as a seamlessly integrated image.

19. (Twice Amended) A method for producing a wide FOV, said method comprising:

producing significantly non-overlapping [non-identical] spatial fractions of an image [fractions];

optically transferring said [image] fractions through relay optics to a redirecting unit; and

directing said [image] fractions to respective non-identical spatial regions of a reflecting unit, such that said image fractions are viewed by a person as seamlessly integrated image.

opportunity to discuss the above-proposed amendments in an interview with the Examiner either in person on Tuesday January 21, 2003 or by telephone.

Should the Examiner have any question or comment as to the form, content or entry of this proposed Amendment, the Examiner is requested to contact the undersigned at the telephone number below. Similarly, if there are any further issues yet to be resolved to advance the prosecution of this application to issue, the Examiner is requested to telephone the undersigned counsel.

Respectfully submitted,

Guy Yonay
